

AI Prompt for Nano Bana for Architecture Model 29

Create a hyper-realistic, cinematic render featuring the uploaded human image (converted to male) working in a futuristic architectural design studio. Keep the male subject's face, posture, and natural expression unchanged, but emphasize his focused gaze as he leans over the uploaded building transformed into a 1:7 scale architectural model on the desk.

The camera angle should be tight and close-up, focusing on the human's intense concentration and the illuminated details of the architectural model. The background should feature a futuristic studio environment, softly blurred but detailed enough to convey advanced technology and creative energy.

The studio should blend high-tech and architectural elements, including:

Large transparent OLED display screens behind him, showing rotating 3D models, exploded axonometric diagrams, and dynamic lighting studies.

Floating holographic projections of design sketches and blueprint overlays above the desk.

Sleek shelving units with scale models and architectural mockups in the background, softly blurred.

A workstation filled with futuristic tools: touch-sensitive tablets, digital styluses, glowing tracing grids, and interactive AR interfaces.

The architectural model must look ultra-detailed and professional, with:

Glowing interiors and subtle warm lighting spilling through miniature windows.

Landscaped surroundings with illuminated pathways, tiny LED-lit trees, and futuristic street furniture.

Textures suggesting advanced materials like smart glass, metallic composites, and polished stone.

Precision-cast shadows from desk lighting to give it depth and cinematic realism.

The lighting should be atmospheric and futuristic:

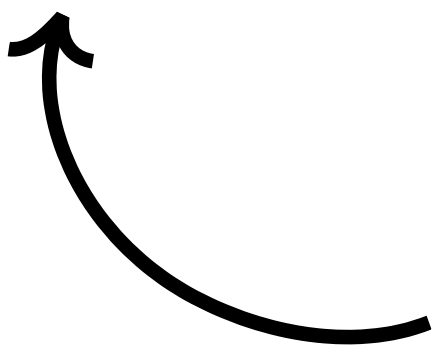

A warm, golden glow from the desk lamp illuminating the subject's face and hands.

Cool blue and teal ambient light from the digital screens, blending into the background.

Gradient tones with a cinematic glow to create a balance of warm creativity and cold precision.

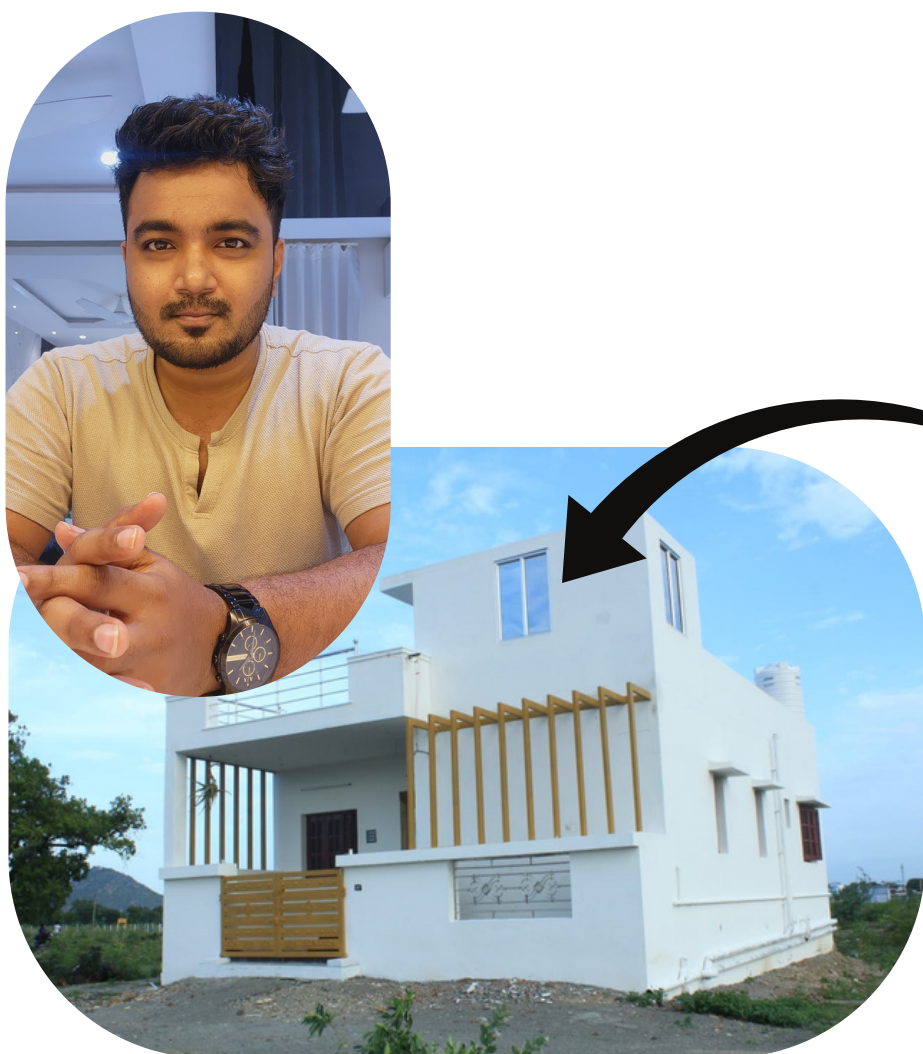

Add cinematic mood detailing: a slightly smoky haze from the soft focus, glowing UI reflections on the subject's skin, and depth-of-field blur on the tools scattered around the desk (scale ruler, fine liner pens, model cuttings).

The overall atmosphere should evoke a visionary architect shaping the future — a perfect harmony of human creativity, architectural craftsmanship, and futuristic design technology. the background should more architecture model and some lightings in the model
