

AI Prompt for Nano Bana for Architecture Model 11

Photorealistic cinematic 8K render at sunset golden hour. The uploaded image building glows in warm orange light, casting long shadows across the tree-lined site. The architect and two site engineers stand on the pavement in reflective sunlight, their helmets catching the glow as they discuss around the 1:7 scale miniature model of the uploaded image.

The portable drafting table glows with warm pendant spotlighting on the printed plans marked with "Interiors_by_jamil." Material samples, sketch pens, and a coffee cup rest beside a wooden pen stand engraved "Design Template Hub." The sky behind the building is a dramatic gradient of orange, purple, and pink, with silhouettes of birds crossing overhead. The mood is warm, cinematic, and emotional — storytelling of design decisions at the most inspiring time of day.
