

AI Prompt for Nano Bana for Architecture Model 14

Cinematic ultra-realistic 8K render of a professional photography studio. At the center, a 1:7 scale miniature of the uploaded image building sits on a matte black table, surrounded by studio spotlights, softboxes, and high-end DSLR cameras on tripods. A photographer adjusts the lighting, while an architect beside him holds printed architectural plans of the uploaded image, pointing at details. In the background, a large seamless backdrop with the uploaded image printed looms behind, giving depth to the composition. On the table, material samples, sketch pens, coffee cup, and a wooden pen stand engraved "Design Template Hub" add realism. The atmosphere feels like a behind-the-scenes cinematic photoshoot, capturing architecture as a magazine cover story.
