

AI Prompt for Nano Bana for Architecture Model 15

Ultra-detailed cinematic 8K render of a timeless architectural library interior, with warm wooden panels and tall windows letting sunlight filter in. The uploaded image building is displayed as a large framed artwork on the wall, and at the center, a 1:7 scale physical miniature model of the uploaded image rests on a drafting table. Surrounding it are printed architectural plans of the uploaded image, open sketchbooks with handwritten notes "Interiors_by_jamil," material samples, sketch pens, coffee cup, and a wooden pen stand engraved "Design Template Hub." Dust motes float in the sunlight, creating a soft archival mood. Bookshelves filled with architectural journals and design references frame the space, blending nostalgia with cinematic storytelling of design.
