

AI Prompt for Nano Bana for Architecture Model 17

Cinematic ultra-realistic 8K render of the uploaded image building set within a forest clearing, embraced by towering trees, morning mist, and golden sunbeams breaking through the canopy. On a rustic wooden log table in the foreground lies a precisely crafted 1:7 scale miniature of the uploaded image, surrounded by rolled and open printed plans, handwritten notes "Interiors_by_jamil," material samples, colored sketch pens, a steaming coffee cup, and a wooden pen stand engraved "Design Template Hub." Nearby, an architect and two site engineers wearing boots and helmets stand in active discussion, pointing at both the model and the real uploaded image beyond the trees. Fallen leaves scatter on the table, light fog moves through the forest floor, and dappled sunlight highlights textures. The scene tells a story of architecture in dialogue with nature, ecology, and design philosophy.
