

AI Prompt for Nano Bana for Architecture Model 19

Ultra-realistic cinematic 8K render of the uploaded image building fully completed, freshly inaugurated with balloons, a ribbon-cutting stand, and subtle festive decor. In front of the building on the pavement, an architect and two site engineers hold printed plans while reviewing the finished project, with a 1:7 scale model displayed on a podium beside them. Around them, potted plants, trees, small groups of guests, and photographers add a celebratory yet realistic touch.
