

AI Prompt for Nano Bana for Architecture Model 20

Ultra-realistic cinematic 8K render of a luxury architect's desk scene where a large-format coffee table book lies open. Across the glossy double-page spread is a high-resolution print of the uploaded image building in perspective view. On top of the book rests a 1:7 scale miniature model of the uploaded image, as though the project has "stepped out of the page." Surrounding the book are rolled blueprints, A1-sized plans, graphite pencils, vibrant sketch markers, tracing paper with overlays, sticky notes scribbled with "Interiors_by_jamil," a steaming ceramic coffee cup, and a polished wooden pen stand engraved "Design Template Hub." A warm pendant light above casts a glow focused on the book and model, while soft reflections bounce off the glossy surface. The atmosphere feels like a private moment inside an architect's creative world.
