

AI Prompt for Nano Bana for Architecture Model 35

An ultra-realistic, cinematic photograph of a 25-year-old architect created from the uploaded image of the young man with the same facial features and hairstyle, seated at a large drafting table in a creative architectural studio. He is deeply focused, sketching architectural drawings with a pencil under the glow of a long desk lamp. The desk is cluttered with design tools—blueprints, rulers, rolled tracing paper, a glass bottle, and small wooden models—adding authenticity to the workspace. Behind him, the wall is covered with pinned maps, architectural site plans, aerial photographs, and conceptual sketches, while shelves above display intricate architectural models, creating a backdrop that conveys vision and process. The atmosphere is warm and professional, with natural light mixing softly with task lighting to create cinematic shadows. The scene reflects a balance of creativity and precision, capturing the young architect's world of design and dedication, while maintaining the realistic depth and mood of the original studio photograph. Human eyes should see the drawing paper
