

AI Prompt for Nano Bana for Architecture Model #6

Ultra-realistic, photorealistic cinematic 8K render of an architect's studio desk. On the desk sits a 1:7 scale physical miniature model of the uploaded image of the building, crafted with fine architectural detailing. Next to it lies a large printed architectural plan of the uploaded image, illuminated by a dramatic pendant light with strong focus. The plan has architect's hand notes written "Interiors_by_jamil" in pen. Scattered around the plan are sketch pens, a coffee cup, and a premium wooden pen stand engraved "Design Template Hub."

On the desk surface are material samples (wood veneer, stone cladding, tile swatches) arranged neatly beside the plan. A small desk plant adds freshness. The scene shows soft glow reflections from raindrops on a modern sleek-profile window frame, where the blurred outside world enhances mood. The ambient light contrast between warm pendant light and cool daylight through the rainy window creates cinematic depth.
