

AI Prompt for Nano Bana for Architecture Model #7

Ultra-realistic 8K futuristic studio interior. On a sleek workstation desk, the uploaded image of the building appears as a glowing holographic 1:7 scale model floating above the surface. Beside it lies a printed architectural plan of the uploaded image, illuminated by a pendant spotlight. A designer's hand sketches notes on the plan. In the background, a sleek-profile window with raindrops creates reflections and depth, enhancing mood. On the desk, a premium wooden pen stand engraved "Design Template Hub." Tone: innovative, cinematic, blending technology with craftsmanship. Material Samples → Add wooden veneer sheets, stone cladding samples, or tile boards near the plan, as if the architect is selecting finishes. Soft Glow Reflections → Raindrops on the window casting blurred reflections of the uploaded image's miniature model. Architect's Hand Notes → Hand-drawn arrows and quick sketches on the plan itself for an "in-progress" vibe. Augmented Reality Glass Effect → The 1:7 miniature model on the desk is semi-holographic with glowing outlines.
