

AI Prompt for Nano Bana for Architecture Model #8

Cinematic 8K render of a minimalist outdoor pavilion with glass canopy. In the center on a sleek stone table sits a 1:7 scale physical miniature model of the uploaded image of the building, protected under a transparent acrylic box. Raindrops slide dramatically down the pavilion's glass walls, reflecting soft glow highlights of the model. Architectural plan sheets of the uploaded image are laid flat on the table, with handwritten notes "Interiors_by_jamil." Nearby, a small desk plant and material samples (wood, stone) are placed carefully. Ambient light plays between cool wet reflections and warm spotlighting from a suspended pendant lamp above.
