

AI Prompt for Nano Bana for Architecture Model #9

Ultra-realistic, photorealistic 8K scene of a serene architectural installation. A 1:7 scale miniature model of the uploaded image of the building floats on a reflective shallow water surface indoors, with ripples creating a dramatic mirrored effect. Around the water pool, printed architectural plans of the uploaded image rest on low platforms, lit by pendant lamps. One plan sheet shows handwritten notes "Interiors_by_jamil." A coffee cup, material samples, and a wooden pen stand engraved "Design Template Hub" are placed on the edge platform. Soft glow reflections shimmer on the water, blending architectural precision with poetic calm.
