

AI Prompt for Nano Bana for Architecture Model #4

Cinematic late-night architect's studio scene, photorealistic 8K. A sleek desk glows under the warm focused light of a desk lamp, illuminating a detailed printed architectural plan sheet. Next to it sits a 1:7 scale physical miniature model of the uploaded image of the building, crafted in precise detail. On the computer screen behind, the uploaded image of the building is displayed within SketchUp or AutoCAD software. Coffee mug, scattered sketch pens, and a refined wooden pen stand engraved "Design Template Hub" add realism. Atmosphere: moody, immersive, storytelling of an architect working late.
