

AI Prompt for Nano Banana for Interior 3d model #2

Create an image of Ultra realistic, photorealistic, cinematic 8K render of an isometric 3D miniature model (1:7 scale) of the uploaded interior design image, placed on a wooden desk. The miniature model is encased in a transparent acrylic display box with fine detailing, textures, and shadows. Warm natural sunlight passes through a nearby window, casting soft shadows, while a modern desk lamp provides focused ambient light. The desk also includes subtle props like a potted plant, sketch pens, and an open notebook for added realism. Depth of field and cinematic lighting enhance the craftsmanship and scale of the miniature model, making it look like a professional studio showcase scene. [Uploaded image] Add Cutting matt, Cutting blade, fevicol and other Model making accessories like scale ruler, fevikwik. Make model into more realistic remove the acrylic glass box and increase the Model size more add table plant
