Upload your Product use word " product " instead of term " Template "

AI Prompt for Gemini Nano Bana for Spider Man

Create an ultra-photorealistic premium commercial advertisement in 1080×1350 (4:5 vertical).

Use [UPLOADED PRODUCT IMAGE] as the main subject. Preserve the product exactly as uploaded, including its original shape, proportions, colors, branding, logo, packaging, labels, textures, and every design detail. Do not redesign, modify, replace, or hallucinate any part of the product.

Position an original red-and-blue masked urban web-slinging guardian (not based on any existing copyrighted superhero) standing dynamically on the edge of a tall concrete rooftop on the left side of the frame. The character is firing a highly detailed, realistic spider-web toward the product below, as if capturing or rescuing it.

The product hangs naturally inside the web, suspended in mid-air. The web should look organic with irregular strands, tangled intersections, varying thread thickness, stretched silk fibers, realistic tension, slight sagging from the product's weight, and translucent silk catching the light. Avoid perfect geometric web patterns.

The background is a dramatic night-time metropolitan skyline with towering skyscrapers, glowing office windows, cinematic blue lighting, atmospheric haze, volumetric light rays, and subtle fog. Keep the composition clean with generous negative space for branding.

The product should be brightly illuminated with premium commercial studio lighting, realistic reflections, soft shadows, HDR rendering, ray tracing, global illumination, ultra-sharp focus, blockbuster movie color grading, and luxury advertising quality.

Add realistic floating dust particles, subtle smoke around the product (if appropriate), and cinematic depth of field to emphasize the product as the hero of the composition.

At the top-right, leave space for:

- Your Brand Logo
- Large Bold Product Title
- Short Tagline
- Call-to-Action Button

Typography should be modern, bold, premium, and highly legible, using red, blue, and white accents matching the overall color palette

Typography should be modern, bold, premium, and highly legible, using red, blue, and white accents matching the overall color palette.

[Uploaded image Logo, Product photo]

Make it more realistic with Good quality
